

IntelliTrack My Warehouse

Overview

My Warehouse is an exclusive online addition to IntelliTrack's third party logistics software, IntelliTrack 3PL.

My Warehouse allows you to manage your warehouse(s) from a secure online area. You're able to view and manage inventory at one or all of your locations whenever necessary.

My Warehouse provides a secure online connection to IntelliTrack's 3PL software and databases. IntelliTrack 3PL software works hand in hand with IntelliTrack WMS to provide advanced warehouse and supply chain management for third party logistics providers. My Warehouse allows you to view inventory, create picking, receiving, purchase, and sales orders in your IntelliTrack 3PL system.

As a third party logistics provider, you're able to provide customers with online access to their inventory using their own log in credentials. This allows your customers to look at their inventory and create a picking or receiving order in the WMS system instantly. If you decide to utilize this feature, My Warehouse allows you to limit your customer access as necessary.

With My Warehouse you'll know when pending inbound or outbound orders are due, and how much inventory you have on hand including what inventory is available, where it is located, what has been received into inventory, and each item's expiration date. Search for inventory by order number, vendor ID, order date, receiving date, due date, site, user, and shipping carrier.

My Warehouse Online Reporting

View inventory reports in My Warehouse including:

- Error Log Reports
- Open Purchase Orders
- Open Sales Orders
- On hand Inventory
- Unreleased Receiving Orders
- Unreleased Picking Orders

System Requirements

Component	Requirement

IntelliTrack My Warehouse

My Warehouse provides online access to IntelliTrack 3PL.

IntelliTrack 3PL Software provides advanced supply chain management for third party logistics providers. IntelliTrack 3PL is added on to the WMS or ISRP application to provide important features involved with managing multiple customers and their inventory. Valuable features include task management, advanced billing and tracking options, multi customer support, customer profiling and reporting services.

IntelliTrack 3PL is available as an add on to IntelliTrack WMS or ISRP.

IntelliTrack Warehouse Management Software (WMS) comes in three cost effective versions ranging in price and features. Developed with scalability in mind, the IntelliTrack WMS product line includes Inventory, Shipping, Receiving, and Picking (ISRP), WMS RF, and WMS RF Professional.

WMS & ISRP are designed to maintain inventory in a variety of business environments. This user friendly inventory tracking system combines state-of-the-art barcode data collection on your portable barcode terminal, with a sophisticated Windows based management program for your PC.

Available in 3 Versions:

ISRP

- Paperless Receiving
- Serial Numbers
- Multiple UOM & Let Downs
- Inquiries
- Move/Transfers
- Physical Inventory
- Cycle Counting
- Kitting

WMS RF Standard

- (Includes ISRP features)
- Terminal Messaging
 - RF Portable Application

WMS RF Professional

- (Includes ISRP & RF features)
- Sequenced Pick & Put Away
 - Pallet Tracking
 - Basic Cubing
 - Replenishment
 - Zone Picking
