

IntelliTrack Stockroom

Overview

IntelliTrack's Stockroom software is designed to be used with portable or fixed station barcode readers to provide a complete turnkey solution to manage your inventory. Stockroom provides efficient tools for inventory, receipt into inventory, routine physical

counts, and managing a perpetual inventory. All IntelliTrack modules are written in Microsoft® Access 2007 and include the source code should you want to customize the Inventory system for your specific needs.

The IntelliTrack Inventory portable software enables the portable barcode reader to collect inventory data automatically. It provides for the collection and storage of user ID, Inventory, locations, and quantities, all with the accuracy, speed, and simplicity of barcodes. The IntelliTrack software includes a ready to run, PC compatible SQL Express to manage all of your inventory data. IntelliTrack includes standard reports, queries, and barcode label printing capabilities.

Stockroom is wireless ready.

RF (WiFi) capability comes with every copy of full version DMS software for real time tracking. To utilize wireless features in Intellitrack DMS software your portable data collection terminal (PDT), PDA, or handheld computer must have a line-mode capable Telnet client, such as Wavelink or Intermec TE2000. A Telnet client provides terminal emulation allowing your wireless IntelliTrack application to connect to a handheld computer running Windows® CE and Windows Mobile.

Added Features

Lite
Version

As part of IntelliTrack's Data Management Solutions, Stockroom is available in a Lite version for smaller inventories. DMS Lite Software allows you to benefit from the full software version for half the cost. Stockroom Lite is limited to 100 items in inventory at a time and does not include wireless features.

When receiving an item into your inventory enter the cost to manage inventory by each item's value. Cost tracking shows the value of your inventory in stock at a given time. Know the last, average, highest, and least costs in your current inventory.

All IntelliTrack products allow concurrent connections meaning, the application can be installed and run on unlimited workstations. The number of workstation licenses purchased limits how many users can be on the system at one time.

System Requirements

Component	Requirement
Computer & processor	2.0 gigahertz (GHz) processor or higher
Memory	512 megabyte (MB) RAM, 1 gigabyte (GB) RAM if running SQL and IntelliTrack software on same computer, or higher
Hard disk	512 megabyte (MB), 2 gigabyte (GB) if running SQL and IntelliTrack software on same computer, or higher
Drive	CD-ROM or DVD drive
Display	1024x768 or higher resolution monitor
Operating system	Microsoft Windows XP with Service Pack (SP) 2 or higher, Windows Server 2003 with Service Pack (SP) 1 or higher, Windows Vista Home Premium, Vista Business, Vista Ultimate Version 7 is compatible with 32 bit operating systems only. 64 Bit users must call IntelliTrack.
Batch mode	<ul style="list-style-type: none"> • Internet Information Services (IIS) • Microsoft Active Sync 4.5 on Windows XP, Windows 2003 Server or higher • Mobile Device Center 6.1 on Vista • Active network card
Other	SQL 2000, SQL 2005, SQL 2005 Express
